

The Terminal, Richmond's oldest newspaper, gives you the news you should have and will continue to protect your interests.

RICHMOND TERMINAL

The Terminal newspaper honestly works for the best interests of the taxpayers and works for more industries and Richmond pay rolls.

VOL. XXVIII

RICHMOND, CALIFORNIA, FRIDAY, APRIL 4, 1930

No. 14

Out of Work Situation Becoming Interesting

Nearly Four Million Men Reported Jobless

Washington, April 4.—President of the American Federation of Labor William Green, in speaking before the senate committee, said:

"The number of unemployed is now nearing four million men, who must be taken care of, or we may have some radical demonstrations in this country."

Green in appearing before the senate commerce committee did not hesitate to tell the true story of the out of work situation. For the alleviation of the workers he recommended a government agency for workers, and a long range public works program to provide employment when industry becomes quiet and payrolls disappear. Oatbillion, he said, if added to the wages of the workers, would have turned the business tide from a recession to an advance.

Loss of employment has an immediate result on retail trade, Green said, asserting that trade and industry depend directly on wage earners for their customers. Intelligent managers, he said, have amortization funds to provide against scrapping machinery, but few have anything to tide over the workers who have been putting their physical and mental ability into operating the old machines.

"Labor is fully persuaded that unemployment can be eliminated as social and economic problems," he said. "We have organizations necessary to contribute to its solution and ready to cooperate in the working out of constructive methods. The employers will have to choose between systematic planning of employment and government."

Green said that talking pictures alone have thrown thousands out of work, some of whom have gone in to other lines.

Aimee Travels to Holy Land

Aimee Semple McPherson, her daughter Roberta, and 23 followers, sailed from New York yesterday, bound for Jerusalem where Aimee says she will preach on Mt. Olivet on Good Friday and Easter Sunday.

College Police Chief Returns

Berkeley, April 4.—Police Chief August Volmer, returned yesterday to his duties as head of the Berkeley police department after an absence of six months. During his absence he was engaged in organization work as professor of police administration at the University of Chicago.

Columbus' Coat of Arms

It was in "the spacious times of good Queen Bess" when the Spaniard was Lord of the Earth. All know the story of his "Invincible Armada"; but it had an unforeseen result through one of the vessels being wrecked on the Fair Isle, off the coast of Scotland, and some 200 of the crew being saved. During a stay of some months there, the Spaniards taught the women their quaint patterns. One of the patterns is a golden anchor on a blue ground. This was the coat of arms granted to Columbus by the Spanish sovereigns as one of the rewards for his discovery of the New world.—Montreal Family Herald.

THE TERMINAL is on file in all the public libraries in Contra Costa county and has hundreds of readers.

Census Enumerators Busy in Richmond

Throughout the nation today census enumerators are taking a complete count of the exact number of residents of the United States. Richmond has a large number of enumerators at work, these aided by lodges, clubs and other organizations who will assist in securing for Richmond an accurate check in the census report.

Postmasters Appointed

President Hoover yesterday sent postmaster nominations to the senate as follows:
Ernest W. Dort, San Diego.
Patrick P. O'Brien, Los Angeles.

Rotary Speaker

William H. Cox, business manager of the Alameda schools, will be the speaker of the day at the luncheon of the Richmond rotary club today. He will discuss some of the problems of the school system.

Elks Install Officers

At Tuesday evening's meeting Richmond Lodge of Elks No. 1254 installed officers as follows:

Exalted ruler, W. F. Wilson; W. W. Scott, esteemed leading knight; F. A. Mero, esteemed loyal knight; L. M. Johnson, esteemed lecturing knight; Edw. W. Dale, secretary; Fred Caudle, treasurer; C. K. Parker, trustee; Dr. C. W. Cole, delegate to the grand lodge; Dennis Shaw, organist.

ORIGINAL 'BAREFOOT BOY'

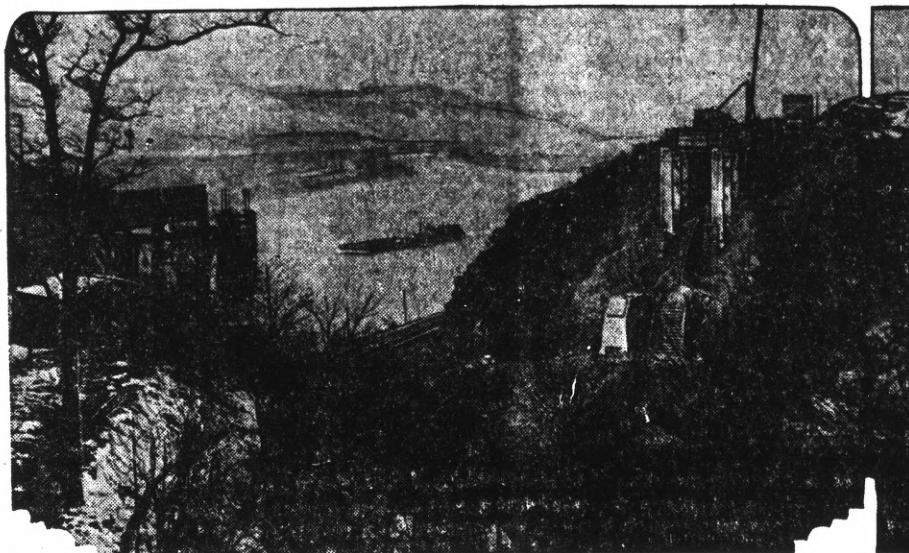

Rev. Hans Peter Bertelson, a retired minister of Blair, Neb., is the original of Whittier's "Barefoot boy with cheeks of tan."

Local Census Takers

Following is the list of census enumerators in the Richmond field:
Mrs. Grace M. Black, Mrs. Marie F. Campbell, Roy I. Cooper, Mrs. Pearl Culbertson, Mrs. Emily Damon, Mrs. C. O. Davis, Mrs. Elsie Farrow, Mrs. Elsie Foster, Mrs. Isabelle Hafner, Mrs. C. H. Hall, Mrs. Lillian B. Jones, Mrs. Margaret Longacre, Wm. M. Maloney, Mae Mathos, Mrs. Edith M. Nyström, George Sanderson, Mrs. Eva Siemer, Melba Tomlinson, Henry W. Turley, Marion L. Windrem, Mrs. Alice Wov.

THE TERMINAL can print it for you. Call up Richmond 133.

Building Largest Concrete Bridge

The Jack's Run bridge under construction as part of the Ohio river boulevard, running out of Pittsburgh. The bridge will have a single span 60 feet wide and will be 1,000 feet long. The only concrete bridge in the world larger than this is one in Germany.

Ford Plant Is Besieged By Vast Throng of Unemployed

Dearborn, Mich., April 3.—Seeking employment 6,000 or 7,000 men waited about the gates of the River Rouge plant of the Ford Motor Co. today while 12 members of the Dearborn police force looked on, prepared for any trouble that might arise.

There were no disturbances. It was announced the company had employed 1,000 men in the last two days.

Is Local Labor Getting a Frost?

The local labor situation at the abundantly advertised cannery now being built on the inner harbor seemed to be of small benefit to Richmond labor, according to reports.

The carpenters crew down there of some 15 or 20 men are said to be from San Francisco. No local carpenters are hired, a number of applicants being turned away daily. Several local carpenters have verified this report.

It seems the much advertised and promised payroll for Richmond workmen is not heading this way, if reports are true.

One applicant for work stated 300 applied at the cannery job in one morning looking for work, but none were employed.

Splinters

Mother was dressing a chicken, and Jane, age four, was close at hand with the usual number of questions. The feathers had been removed, but the pin feathers were numerous and much scraping was necessary.

"Oh, mother," exclaimed Jane, "how did the chicken get all those splinters in it?"

All-Electric Freezing Machine Now On Market

San Francisco, April 4.—Perfected at a preliminary cost of a half million dollars final tests of the new Majestic all electric refrigerator, which is expected to be on the market in June, have been completed. A \$9,000,000 plant has been constructed in Chicago, adjoining the site of the Majestic radio factories, and the initial production of refrigerators will be 500 a day.

The Majestic refrigerator will be an all-steel box with bakelite trimmings, and have three inch insulation. The motor, pump and all machinery will be enclosed.

During the tests it has been demonstrated that the machine is absolutely silent, and so free from vibration that a coin placed on edge over the pump will not topple over.

Because of several new mechanical features, the freezing apparatus is regarded as a big improvement over any other model offered. Ice can be turned out three hours after the refrigerator's installation in any home. Final tests of the refrigerator were made at Phoenix, Arizona, in the presence of W. C. Grunow, vice-president of the Grigsby-Grunow Company.

Richmond Gets High Rating

Richmond's three local hospitals were awarded the highest rating at the meeting of the national hospital council in Baltimore. The records of the hospitals during the past year in the treatment of patients was considered in the award.

A classified adv. will sell it

RANDOM COMMENT

Press dispatches indicate that the French delegates at London are much discouraged by the lack of creative plans at the naval conference. Well, we supposed that the delegates were interested not in creative plans but in plans for scrapping.

....
If the price of wood pulp increases and it is found that our newsprint can be made from cornstalks, maybe in ten years from now the slogan for the farmer will be, "raise more cornstalks and preserve the freedom of the press."

....
When a jury reported in court in Pittsburgh the other day, the foreman, who was a woman, reached in her purse for the verdict and then had to tell the judge she had misplaced it. Doesn't it sound home like?

....
A Chicago woman has brought suit for divorce and charges among other things that her husband permitted four saxophones in the home. This ought to come under the ban against cruel and unusual punishment.

....
The next squeeze may not be in the stock market but in woman's fashions. The latest announcement from Paris is that the waists will be tighter in the new dresses.

....
Richmond is situated on a peninsula, and is surrounded on three sides—south, west and north, by the waters of two bays, San Francisco and San Pablo.

....
Construction of the bridge across the Russian river near its mouth will start in September, five counties to share in its cost, estimated at \$195,000.

Have it printed at The Terminal.

Financier From East With Cheering News

Rotary Pageant to Be Gala Affair and Colorful

Oakland April 4.—Delegates to the second district Rotary conference, which is to be held here May 8, 9 and 10, are to be entertained with one of the most colorful and allegorical pageants ever staged in the history of Rotary, according to the committee in charge of arrangements for the conference.

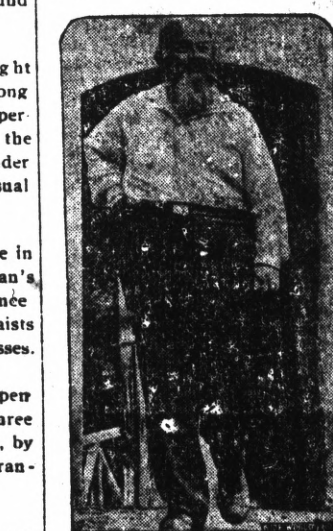

Designated "International Symposium" the pageant is to be staged in the civic auditorium arena. More than 2,000 persons will take part in it. Max Horvinski, past president of the local Rotary club, has written the continuity for it and will direct its presentation.

Preparations for the spectacle have been under way since last October. Those familiar with its details declare nothing like it ever before has been attempted in Rotary. Its various phases, it is explained, are deftly knit together to form a complete whole. One of its outstanding features will be a chorus of 1,000 trained voices.

W. A. Porter is the newly elected councilman, who succeeds Councilman Thomas E. Caldecott, now mayor of Berkeley and a leading pharmacist of the college city.

Long Beach is building a one million dollar municipal auditorium.

THE "WONDER DOCTOR"

Although the medical profession refuses to take him seriously, Valentine Zellela, the "wonder doctor" of Gallup, N. M., has just given \$100,000,000 to endow a medical center in this city, as a memorial to his little daughter, the late Lois Grunow.

The million dollar fund will be devoted to establishing a large clinical laboratory for the furtherance of medical science, administered by a group of prominent Phoenix physicians.

Mr. Grunow is one of the few non-medical men in the world to hold an honorary membership in the American College of Surgeons. This honor was conferred upon him because of his development of the "Bloodless Knife," a radio frequency surgical instrument which cuts by radio waves, and has been found by surgeons to be one of the greatest aids in cancer operations ever to be developed.

Redon to Beach is to vote on a \$165,000 bond issue, which is to provide funds to build a new high school.

California Banker Is Optimistic About Future

San Francisco, April 4.—A. J. Mount, president of the Bank of Italy and head of the California Bankers' association, and who has just returned from a business trip to New York, reports that there is a much better feeling in the east and that business is slowly on the upper trend. He said: "As the contemplated building projects get under way the unemployment situation will take care of itself. Eastern bankers feel that the stock market is rising too rapidly; they would rather see the recovery continue at a slower pace—they don't want stocks to go up too fast."

Do Taxpayers Receive Full Dollar's Worth

Relief from the ever-increasing burden of taxation can only come through obtaining a real dollar's worth of service for every tax dollar expended.

What the government needs is not more money but more efficiency in its operations. To bring this about means that there must be a most careful scrutiny of every governmental program and expenditure.

In keeping with this policy of careful scrutiny, the taxpayers of all communities should ask themselves these questions:

What do we want our government to do for us?

How much are we willing to pay for government services?

How many of these services are true governmental functions?

Is our government giving us a full dollar's worth of service?

Does the way the government spends our tax money increase or decrease the wealth of the community?

Is the tax burden of the community rising more rapidly than the ability of the people to support it?

The answers to these six questions will determine the kind of government your community is receiving and the amount of money that will be extracted to support it.

Establishes Clinic In Phoenix, Arizona

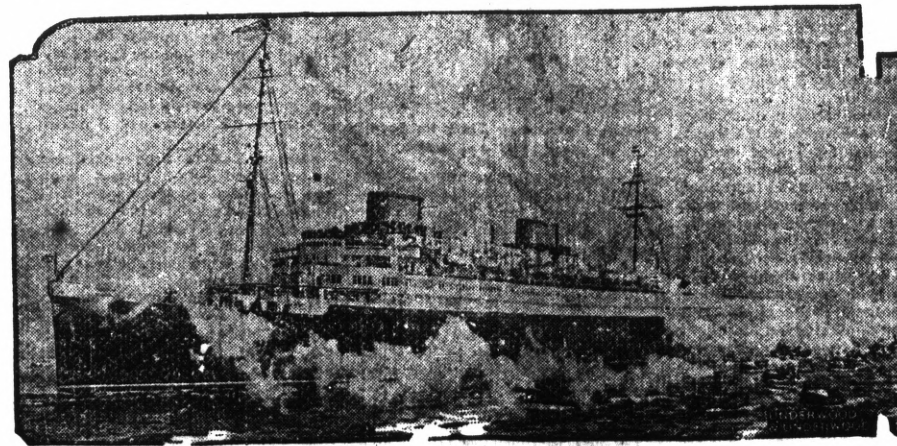

Phoenix, Ariz., April 4.—William C. Grunow, vice president of the Grigsby-Grunow Co. of Chicago, manufacturer of Majestic radios, has just given \$100,000,000 to endow a medical center in this city, as a memorial to his little daughter, the late Lois Grunow.

The million dollar fund will be devoted to establishing a large clinical laboratory for the furtherance of medical science, administered by a group of prominent Phoenix physicians.

Mr. Grunow is one of the few non-medical men in the world to hold an honorary membership in the American College of Surgeons. This honor was conferred upon him because of his development of the "Bloodless Knife," a radio frequency surgical instrument which cuts by radio waves, and has been found by surgeons to be one of the greatest aids in cancer operations ever to be developed.

Redon to Beach is to vote on a \$165,000 bond issue, which is to provide funds to build a new high school.

Europa, New Queen of the Seas

The Europa, completely reconditioned after her disastrous fire about a year ago, will attempt to break the record of her sister ship, the Bremen.

Insures Your Complexion

Some Women Are Always Admired

You too want to be lovely and admired. You can have a radiant complexion and the charm of youth if you use MARCELLE Face Powder.

MARCELLE Face Powder quickly matches your complexion and brings out the sweet charm that every woman has.

MARCELLE Face Powder makes your skin feel younger and you yourself look younger.

Then people will admire you and say—"What lovely skin you have!"

Popular size packages at 25c and 50c, all shades—"at all dealers."

Send for free literature, sample and complexion chart.

Well!

Mother—Geraldine's boy friend seems sort of put out about something. You haven't said anything to him, have you?

Father—Not a word. As a matter of fact I haven't even seen him since I handed him the bill for reupholstering the sofa.

Don't let SORE THROAT get the best of you...

FIVE minutes after you rub on **Musterole** your throat should begin to feel less sore! Continue the treatment **once every hour for five hours** and you'll be astonished at the relief.

Working like the trained hands of a masseur, this famous blend of oil of mustard, camphor, menthol and other ingredients brings relief naturally. It penetrates and stimulates blood circulation and helps to draw out infection and pain. Used by millions for 20 years. Recommended by doctors and nurses. Keep Musterole handy—jars and tubes.

To Mothers—Musterole is also made in milder form for babies and small children. Ask for Children's Musterole.

MUSTEROLE
BETTER THAN A MUSTARD PLASTER

Mail Romance

Several months ago Miss Helen Taylor, clerk in the post office in Brunswick, Ga., wrote her name and address on a slip of paper and placed it in a mail bag, not knowing where the bag was going. The bag reached Cedar Rapids, Iowa, and the slip of paper fell into the hands of Charles Ingram, night register clerk. He wrote to Miss Taylor. The two exchanged photographs, and a short time ago he went south. Now Mr. and Mrs. Charles Ingram are back in Cedar Rapids.—Indianapolis News.

BRILLIOUS?

Take NATURE'S REMEDY—**NR TO-NIGHT**. You'll be "fit and fine" by morning—tongue clear, headache gone, appetite back, bowels acting pleasantly, bilious attack forgotten. For constipation, too. Better than any more laxative.

At drug stores—only 25c. Make the test tonight. **FEEL LIKE A MILLION. TAKE NR TO-NIGHT TOMORROW ALRIGHT.**

Peculiar House Rental

Wishing to assure his mother a comfortable home for the remainder of her life, George Albert Drovyn, Philadelphia attorney, leased a house to her at an annual rental of one red rose, payable the first day of June in each and every year, according to an agreement recorded at the Philadelphia City hall.

Ultimate Judgment

We shall be judged, not by what we might have been, but what we have been.—Sewell.

Kidney's bother you?

If troubled with backache, bladder irritations, and getting up at night, don't let chance help your kidneys at the first sign of disorder. Use **Doan's Pills**. Praised for 50 years. Endorsed by thousands of grateful users. Get Doan's today.

DOAN'S PILLS
A DIURETIC FOR THE KIDNEYS

Work on the \$30,000 addition to Pacific Union College, east of St. Helena, has been commenced. The building will house the physics, chemistry and biology departments.

Company I of the One Hundred and Eighty-fourth Infantry, Eureka's new National Guard unit, is nearing completion of its enlistment quota, according to Captain Joseph P. Basler.

Ahepa Lodge, an organization designed to encourage persons of Greek parentage to take out American citizenship papers has organized a chapter in Salinas, according to George Cominos.

CALIFORNIA NEWS REVIEW

Negotiations were virtually completed for purchase of downtown property as a site for Sacramento's proposed \$1,250,000 postoffice and federal building.

The Supreme Court was asked to set aside recent decision sustaining validity of portions on the motor vehicle act of California which impose a graduate license fee on motor vehicles used for transportation for hire. In two cases from northern California, brought by Carley and Hamilton, Incorporated, and others, and by George T. Cottingham and others, the graduated fee as measured by weight was challenged as unconstitutional.

Consolidation of the Tubercular Jewish Ex-Patients' Home and Jewish Consumptive Association under the name of the Jewish Consumptive and Ex-Patients' Relief Association, with headquarters in Los Angeles, was filed with the secretary of state. The company includes among its directors Harry K. Cohen, Aaron Finkelstein and twenty other Los Angeles residents.

The promotion of Colonel Wallace A. Mason, commanding officer of the 184th infantry, California National Guard, stationed at Sacramento, to the rank of brigadier general to command the Seventh-ninth brigade, was announced by Adjutant General R. E. Mittelstaedt. General Mason is to command the 159th infantry located in the San Francisco Bay district, San Jose and Gilroy, and the 184th infantry, located in the Sacramento Valley. General Mason has been a member of the California National Guard for more than ten years. His war record includes service on the Mexican border and as lieutenant, captain and major in the 117th Engineers, Forty-second, Rainbow Division, in the World War.

During Army Air Corps maneuvers at Sacramento, April 1-24, pilots of the 95th Pursuit Squadron, stationed at Rockwell Field, California, with their Wasp-powered Boeing fighters will demonstrate that the Army can fight three miles further from mother earth than it did in 1918. Airplanes fought over the western front at altitudes hardly exceeding 15,000 feet, these fast little Wasps of the air can perform at double that height. Some of them have climbed to and maneuvered at 31,200 feet.

Practically all southern California interests were agreed on the allocation of Boulder Dam power distribution. The agreement was reached following a conference between representatives of the Department of the Interior, the city of Los Angeles, the metropolitan water district and the Southern California Edison Company. Allocations agreed upon follow:—To Arizona and Nevada, 1888 per cent each of all power to be taken at any time and in such quantity as needed. To the metropolitan water district, 36 per cent; City of Los Angeles and smaller municipalities, 19 per cent of which the smaller municipalities shall have approximately 6 per cent; to the Southern California Edison Company, 9 per cent.

The Stockton Girls' Aeronautical Club was recently organized by fourteen young women interested in aviation, and plans were discussed for purchase of a glider and erection of a clubhouse at a local airport.

Martin said educators of his county are back of him in urging that the tenure law be restored to its 1927 status, applying only to schools with eight or more teachers. The existing law, opposed in many rural districts, assures permanent positions to all teachers who have completed probationary periods satisfactorily.

Sonoma, metropolis of Tuolumne County, gold and lumber district expects to have a \$250,000 hotel. The town is enjoying a big tourist trade due to the lure of the Sierra.

Tahoe National Forest headquarters has received word that the Department of the Interior has approved a \$42,000 appropriation for the surfacing of the nine miles of the Yuba Pass highway between Sierra City and Shady Flat. Six miles of this road was constructed last year, with the exception of the surfacing, at a cost of \$140,000, and the additional three miles was recently approved at an expenditure of \$30,000. The remaining five miles will appear on the 1931 budget of the bureau of roads, Department of the Interior.

The San Joaquin County Pioneer and Historical Society will call for bids within a short time for the \$20,000 Haggin Memorial Museum at Victory Park. A portion of the structure will be devoted to works of art and the remainder to historical relics.

Kern County had set a record for expenditures on new roads, with \$426,814 of its 1929 general tax collections set aside for that improvement according to figures submitted by State Comptroller Ray L. Riley.

Work on the \$30,000 addition to Pacific Union College, east of St. Helena, has been commenced. The building will house the physics, chemistry and biology departments.

Company I of the One Hundred and Eighty-fourth Infantry, Eureka's new National Guard unit, is nearing completion of its enlistment quota, according to Captain Joseph P. Basler.

Ahepa Lodge, an organization designed to encourage persons of Greek parentage to take out American citizenship papers has organized a chapter in Salinas, according to George Cominos.

Finis was written to the amateur efforts of Truckee businessmen in dog race promoting, with the recording of deeds in the county courthouse transferring the Truckee winter sports hill of thirty-seven acres and improvements from the Sierra Dog Derby Association to the Tahoe-Sierra Dog Derby Ltd. The Sierra Dog Derby Association sponsored the 1929 dog derby, the first in California, at a financial loss of \$12,000. Assets of the organization and lease have been turned over to the new organization.

Leasing of Ross Field at Arcadia, near Pasadena, from the federal government for the use of the state air corps has been approved by the secretary of war. It was announced by Adjutant General R. E. Mittelstaedt of the National Guard, Griffith Park, Los Angeles, will continue to be used for aerial activities of the National Guard until the present five-year lease expires.

The 1931 convention of the California Public Schools Business Officials Association will be held in Fresno. David P. Hardy of San Francisco is the newly elected president.

Until a seat is provided for every pupil, the school board at Pittsburg is considering a proposal to defer construction of all special rooms, such as auditoriums, gymnasiums and swimming pools.

California leads the world in aviation development, and is considered the logical center for commercial Zeppelin activities on a huge scale. More than ten per cent of the landing fields and airports in the United States are to be found in California, while 12 1/2 per cent of the licensed airplanes are registered here.

Railroads in California may not charge more for a short haul than a long haul over the same route, without first obtaining permission from the Railroad Commission. The commission made the ruling when it ordered the Southern Pacific to remit approximately \$2,500 in charges against the San Francisco Milling Company. The shipments in question were those made by the company between points in Sonoma and Sacramento counties.

Complete rehabilitation of Mather Field by replacing present temporary structures with permanent buildings was indicated in advice received by Arthur D. Dudley, manager of the Sacramento Chamber of Commerce. Dudley was asked by H. J. Adamson, aviation expert of the War Department, to inspect with him the \$3,000,000 development at Mather Field, Riverside, with prospects that a similar expansion will be undertaken at the Sacramento airport.

Tijuana, Lower California, which a few weeks ago was growing into a Mexican Gretna Green for Californians, has lost that reputation. Governor Tapia, new executive of the Northern district, recently ruled that none but resident Tijuanaans could legally be married there. The fee is only \$5. It was formerly \$31 per marriage knot for visiting and impatient Americans.

A joint highway district for constructing four approach roads to Lassen Volcanic National Park was formed at Redding, following a meeting of supervisors from Shasta, Siskiyou, Modoc, Lassen, Plumas and Butte counties. Roads from Chester, the Pacific highway, Cassel and Poison Lake are planned.

Authorized by council, City Manager Lockwood of San Diego ordered an enlargement of the Moreana reservoir to cost \$70,000 and water main replacements to cost \$18,000.

San Francisco led all cities of the Pacific Coast in intercoastal trade for the fiscal year ending June 30, 1929, according to Shipping Board tabulations released recently. Los Angeles was second and Seattle ranked third. Cargoes originating on the Pacific Coast were more than double shipments consigned from Atlantic and Gulf ports. A total of 6,907,559 long tons of cargo was shipped eastward, compared to 2,959,559 long tons starting from the Gulf and eastern parts. Traffic in oil was heavy from Southern California. Los Angeles tankers embarked with 2,659,293 barrels of oil, while San Francisco oil shipments were 204,534 barrels. Strange as it may seem, some 2,000,000 long tons of sugar from the Southern states were received at San Francisco.

Leslie T. Alward, U. S. mail carrier between Redding and Big Bar, under contract, won an appeal to the Supreme Court for review of a State Supreme Court decision holding him liable to the state 5 per cent highway tax. The tax is assessed against highway transportation companies. Alward claims that it is invalid as a tax upon United States mail receipts.

Five California cities will participate in the Scout centennial and tenth anniversary celebration of the Fresno order to be held at Fresno early in April. Three hundred candidates will be initiated at the annual ceremony, with drill teams, pool balls and bands from Stockton, Oakland, Sacramento, Visalia and Long Beach participating. Los Angeles and San Francisco orders are also expected to attend.

The Railroad Commission authorized the Southern Pacific to stop running passenger trains on its Ocean View branch between San Francisco and San Bruno until further orders from the commission. The service was temporarily halted in November, 1928.

Purchase of five giant 4-motored \$0-passenger air liners, America's largest land planes, at a total cost of \$550,000 was announced by C. W. H. Smith, general traffic manager of Western Air Express. The planes have a cruising speed of 140 miles per hour, Smith said.

Milady's Clothes Must Be Youthful

Apparel Grows More Romantic; Sifting Out Most Desirable Models.

Thousands of words have already been written concerning the recent Paris opening, notes a fashion correspondent in the New York Times. Out of this vast welter of facts concerning colors, lines, fabrics and details of design it will remain for the next few months to sift that which is really pertinent to the modern fashion trend and that which is merely incidental. Certain it is that we are in the midst of exciting times, for a new fashion is being evolved before our eyes which promises to be more fascinating in its diversity, more individual and more beautiful than any that has gone before. Women are daring more today than they have in many years, and the haute couture is aiding and abetting them with clothes designed to enhance the charm of the wearer to the nth degree. Only the timid, the careless or the unimaginative will fail to realize the possibilities of the mode of 1930 for presenting one's self to a critical world in the best possible light.

Clothes today are dramatic—and every woman loves the right setting. They are the embodiment of a mood. The sports clothes, for instance, are casual, well bred, achieving a careless air through their very perfection of cut and fabric. And, above all, they are youthful. The Parisienne, who has decided ideas about the clothes for the occasion, still prefers the short skirt for this type of garment, and wears her tweeds and jerseys four or five inches below the knee, while the American, more prone to extremes, frequently drops hers an inch or so lower.

Must Be Perfectly Tailored.

For street one must be smart, perfectly tailored, preferably in dark blue or black, and if the costume be a suit, with a feminine touch in a bou tonniere, and sheer lingerie or soft crepe blouse. Frocks for street go for simple lines, usually have accompanying jackets or three-quarter coats, and may be an inch or so longer than the sports costume.

For formal afternoon wear elegance is the keynote. Introducing soft clinging fabrics, long slender lines, the hat with irregular brim which lends elegant beauty to the face, a stunning bracelet, ring or jeweled clip for a highlight, shoes and bags which match.

The evening mode—the last act of the clothes drama—presents a stirring climax, for here we have fashion in its most romantic and seductive guise. Every woman may pretend she is somebody else when the lights are lighted—somebody far removed from the exigencies of everyday life. The Greek, the Empire, the Directoire, even the quaint charm of the Victorian era, are hers for the choosing. Or, if she prefers, she may don a frock as modern in inspiration as tomorrow's skyscraper. She has but to consult her mirror, decide upon her type, and fashion is prepared to do the rest.

The openings show certain themes as predominant in the new spring clothes, which are established beyond question. The cape, for instance. We have long capes, short capes and capelets.

Flamenco Afternoon Dress for Spring in Black, Red and White.

lets, capes for morning, afternoon and evening; and just when the last word has apparently been said upon the subject a new model appears more charming than the last, and we succumb to its irresistible lure.

Three interesting variations of the cape theme are Chanel's sleeveless dress of beige jersey with detachable cape lined with pink dot jersey. Le long's afternoon dress of navy felt crepe with triple capelet, and Irene Dana's evening gown of black crepe with ruffled cape forming cap sleeves.

The first mentioned is typical of a large group of sports costumes. Chanel's model showed many light weight tweed frocks with separate coats having short capes. Groups used capes throughout her collection, with especial emphasis on the short detachable cape for sports wear. This

designer also used short to hip-length capes on sleeveless jackets or short capes with suspenderlike straps attaching them to the skirt. Marthe et Renee frequently show matching capes in place of jackets, and Martini et Armand emphasize the cape line in directoire coats, shaped at the waist, with revers and capelets. Short Wraps for Evening.

Irene Dana has offered a number of short evening wraps with capes worked over the shoulder, while Worth shows hip-length capelets with slits for the arms. Fitted capelets, in gored sections, take the place of sleeves in several of Chanel's jersey and lace-knit tweed daytime frocks. In fact, it is a cape year, and there will undoubtedly be a cape for every type and occasion.

Suits had the success which was promised as far back as the midseason openings. From O'Rossen's early showing on through, suits were prominent in almost every collection, with special emphasis on the peplum jacket, which seems destined to enjoy an enormous vogue in this country. Le long did some especially charming models in flat crepe, cunton crepe and

Attractive Ensemble for Sports or Street; in Brown and Beige.

flamenco, the silk suit being one of the outstanding developments in spring fashions. Sometimes the peplum jacket was combined with a frock, sometimes with blouse and skirt. Soft frill like collars of the silk or narrow "nun's frills" of white organdie are features of Le long's suits.

As to sports suits, there is much comment on the cordigan suits of jersey lined with chiffon, with chiffon blouses to match. Checked and plaid chiffons are combined with plaid colored jersey, and the unusual combination is decidedly chic. Very wearable is a sports suit—a tweed ensemble in a soft shade of teal brown attractively combined with brown and yellow grosgrain ribbon, from Goupy Blas folds of the materials are used for the triple peplum of the blouse, with the flare repeated at the hemline.

Ensembles and Blouses.

One of the "sensations" of the opening was Lucile L'ury's short-sleeved ensemble. This is a clear departure from previous designs in coats and dresses and has caused much excited comment. The coat is in navy blue with bloused bodice and sleeves ending just below the shoulders. On one side is a striking sun-ray encrustation of white, to match the white crepe de chine frock designed for wear with the coat. The frock has a finely plaited overskirt, ending in points, and the lower sections of the sleeves, which show beneath the coat, are also finely plaited and finished with bows at the wrist.

The Irene Dana evening frock is another popular model and will undoubtedly be much seen at late spring and summer dances. Lace, which might have been supposed to have reached the peak of its vogue during the early winter, has apparently only just begun its career. For Chanel's lace frocks are lovelier than ever—especially her blue and black one. Augustenbernard, Molyneux and Callot are also doing much with lace.

Lucile L'ury has a blouse collection of much interest, stressing organdie, lace and eyelet embroidery in lingerie blouses of delicate charm. She also uses prints very cleverly, one overblouse of a yellow and black print having diagonal frills of the material. This is one of the new short blouses just reaching over the skirt band, and is finished at the bottom with a plaited frill.

Suzanne Talbot's bright navy and white striped cotton blouses, worn with navy skirt and jacket suits, have come in for much favorable comment, as have Chanel's youthful plaid gilets and blouses, and her plaid or checked chiffon blouses designed for wear with jerseys and tweeds.

Schlaparelli has gone in strongly for bright-colored crepes and silk bourettes in blouses for her tailored and sports suits, frequently offering the blouse in a color contrasting with the suits. An unusual feature of several of the Schlaparelli blouses is the contrasting yoke, usually finished with a scarf collar of unusual design. Incidentally Schlaparelli has caused much comment with her colored seamless hostery.

Crystal Chains Searl Fashion.

Crystal chains which are worn scarf fashion are a recent jewelry fad.

The upsets of Children

All children are subject to little upsets. They come at unexpected times. They seem twice as serious in the dead of night. But there's one form of comfort on which a mother can always rely; good old Castoria. This pure vegetable preparation can't harm the tiniest infant. Yet mild as it is, it soothes a restless, fretful baby like nothing else. Its quick relief soon sees the youngster comfortable once more, back to sleep. Even an attack of

colic, or diarrhea, yields to the soothing influence of Castoria. Keep Castoria in mind, and keep a bottle in the house—always. Give a few drops to any child whose tongue is coated, or whose breath is bad. Continue with Castoria until the child is grown! Every drugstore has Castoria; the genuine has Chas. H. Fletcher's signature on the wrapper.

Shocking

And now another ideal takes a tumble when M. Pileurget, one of the well-known Parisian designers, declares:—

"The young lady who dresses in neutral tones is frequently catalogued as dowdy, quiet or demure; when more than likely, she is very clever in that she desires to fit into the color scheme of any auto that may come along."

Unfailing Supply

It's easy to entertain guests in the city because you can get plenty of food just by opening a can, and plenty of music just by opening a window.—Life.

Discouraging a Censor

Probation Officer L. J. Kinney of Placer county, California, is through censoring dances to enforce an ordinance passed limiting attendance at public dances to persons more than eighteen years of age after midnight. Kinney says he recently tapped a dancing dais on the shoulder and asked her if she knew about the law. She led him to the dressing room, where two young babes were sleeping on a cot. "Those are my grandchildren," she scornfully informed him.

All the world's a stage, but some don't like play-acting and become hermits.

Three Mothers Agree

When mother is tired, nervous or ill the whole home is upset. For her family's sake, every mother wants to be well and strong. These three women tell how Lydia E. Pinkham's Vegetable Compound helps them to care for their families.

Mrs. H. Dolhonde,
6318 York St.,
New Orleans, Louisiana

"Before my last baby was born, I started taking Lydia E. Pinkham's Vegetable Compound. I got such good results that I named her Catherine Lydia. I have six older children and five grandchildren, too. I am now taking the Vegetable Compound again because of my age. I eat and sleep better and I do all my housework, and my washing. I will do my best to answer letters."

Mrs. Harold Goodnow
36 Cane St.,
Fitchburg, Massachusetts

"I cannot praise your medicine enough. After my baby came I was rundown. I had to go to bed often through the day. I took three bottles of Lydia E. Pinkham's Vegetable Compound and I felt like a different woman. If any mother has those tired feelings I advise her to take Lydia E. Pinkham's Vegetable Compound."

Mrs. Lloyd R. Blasing,
115 So. Ohio St.,
Anaheim, California

"After my baby came I was so nervous and tired that I felt miserable. One day a booklet was left at our door and after reading it I decided to try Lydia E. Pinkham's Vegetable Compound. I am now on my fourth bottle and I feel much stronger. It has helped me in every way and I feel sure that other women in rundown condition will pick up if they will only take a few bottles."

Kill Rats Without Poison

A New Extremity that Won't Kill Livestock, Poultry, Dogs, Cats, or even Baby Chickens

K-R-O can be used about the home, barn or poultry yard with absolute safety as it contains no deadly poisons. K-R-O is made of Squill, as recommended by U.S. Dept. of Agriculture, under the Concoction process which insures maximum strength. Two cans killed 578 rats at Arkansas State Farm. Hundreds of other testimonials.

Sold on a Money-Back Guarantee.

Insist upon K-R-O, the original Squill extirminator. All poultry supply, drug, and seed stores. (See large ad four times as much) \$2.00. Direct if dealer cannot supply you. K-R-O Co., Springfield, O.

K-R-O KILLS RATS ONLY

AND CANGUAGES FLY AWAY

Nothing like this specialist's remedy. Carbolic instantly stops pain. Heals over night. Carbolic from druggist. Red trouble in 24 hours. Amazed. Quickest relief ever known.

Points of Resemblance

Quite Easily Explained
Mrs. Elsie Clarkson, settlement worker, was criticizing short skirts. "It's bad enough for the so-called fashionable people to wear them, but for the working girl, usually living in neighborhoods none too safe after dark, it is downright folly. And besides, some of these skirts are really ridiculous. They remind me of a story."

"A young man, meeting a girl in a New York night club, said: 'Didn't I meet you last summer at Palm Beach?'"

"Oh, no; it must have been my sister—she was down there last summer."

"In that case, you must be twins."

"No, we're not, but our legs look exactly alike."—Los Angeles Times.

Scot Accent Contagious

English purists are aroused over a curious situation which has arisen in some of the market towns of Essex. So many Scottish farmers have settled in this district that slowly but surely the Lowland Scots' accent is taking the place of native English.

Makes Life Sweeter

Too much to eat—too rich a diet—or too much smoking. Lots of things cause sour stomach, but one thing can correct it quickly. Phillips Milk of Magnesia will alkalize the acid. Take a spoonful of this pleasant preparation, and the system is soon sweetened.

Phillips is always ready to relieve distress from over-eating; to check all acidity; or neutralize nicotine. Remember this for your own comfort: for the sake of those around you. Endorsed by physicians, but they always say Phillips. Don't buy something else and expect the same results!

PHILLIPS Milk of Magnesia

Who Won Those Bets?

By H. IRVING KING

(Copyright.)

JOHN CRAMMER asked Amelia Washburn to be his wife and she said to him nay. "Oh, what do I care?" thought Johnny to himself as he left the house of the rectorial young lady, "there are just as good fish in the sea as ever were caught. I'll look around—go for a trip abroad, maybe. I'll find some girl who can appreciate a first-class offer of marriage when she gets one."

And Amelia thought: "Johnny Cramer always was a conceited creature. Why, he acted as if he thought I would drop into his mouth like a ripe plum. This will teach him a lesson. There are plenty of young men fully as desirable as Johnny and not half so self-sufficient who will be willing to see that I am not left to braid St. Catherine's tresses."

The fact was that, in addition to being naturally endowed with the gift of self-appreciation, Amelia and Johnny had been brought up to think extremely well of themselves. On the night of his rejection by Amelia, John sought out a disreputable friend of his with whom he played cards and caroused—until all hours in the morning. To this friend he confided the fact that Amelia Washburn had rejected him.

"Heart broken?" inquired the friend. "Not a crack," replied Johnny. "Then it's your vanity that has been wounded."

"Nonsense," cried Johnny. "I haven't any vanity and nothing is worrying me. Deal the cards."

Amelia's sleep was broken that night. She was afraid she had not been gentle enough in her dismissal of Johnny, but then he only got what he deserved. No, she did not regret her action in the least. She would not marry John Cramer if he asked her fifty times. She could look higher, she hoped. At breakfast the next morning she reminded her father of that trip to California upon which he had been promising to take her. And the idea falling in with the father's inclination, it was agreed that they should start for the climate state at once.

"It is high time I was considering the subject of matrimony," she told her father. "The first thing you know you will have an old maid on your hands. I want to look around the world and see people, and pick out a suitable person for a husband."

"Well, look around then," replied Washburn. "See the many men of my climes; but I bet you a new car you marry a New York man after all."

"Against that car I'll bet you a new hat that I pick up a husband in my travels," retorted Fanny.

"I am going to sail on the Platonic, next Wednesday," Johnny told his friend. "I shall take a good look about the world and probably bring back a wife with me when I return. I am tired of a single life."

"Bet you a hundred you come back single as you depart," said the friend. "Bet you the same I find a wife abroad," said Johnny. And so it happened that while Amelia was speeding West by train, Johnny was speeding East by steamer, both on a similar mission. When Johnny had tired of Europe he went on to India and beyond. And when Amelia had tired of the Pacific she pushed on to the Hawaiian Islands and beyond.

Kipling has said that "East is East and West is West, and never the twain shall meet." But he was wrong about that—geographically, at any rate. They met at the one hundred and eightieth degree of longitude, about half way across the Pacific, where you gain a day or lose a day, depending upon which direction you are travelling. Also if one person starts West and keeps going, and another starts East and keeps going, there is every chance that they will meet somewhere on the trip. And thus it happened that John and Amelia met in Tokyo, at an exceedingly expensive hotel—as most Japanese hotels are these days—and were actually glad to see each other.

A whole year had passed since that little proposal and rejection affair of theirs, and if you had witnessed their meeting you would have supposed that they had forgotten all about the trifling incident. But they hadn't—and each was exceedingly curious to know if the other had been married, become engaged, or fallen in love in the meantime. Amelia was the first to exhibit her laudible curiosity. "Are you still unmarried?" she asked lightly.

"Yes," replied Johnny, "and you—are you Miss Washburn still?"

"I am," she replied calmly.

"Just one year ago—" She looked at him keenly. There could be no doubt what he was going to say—he was going to renew that year-old proposal of his.

Amelia grasped the situation in an instant and broke in hastily. "You asked me if I was still Miss Washburn. I am—but I shall not be so very long. I think I expect to be married as soon as I return to New York."

Johnny sat silent for a long time and then asked dolefully: "May I ask who is the fortunate man?"

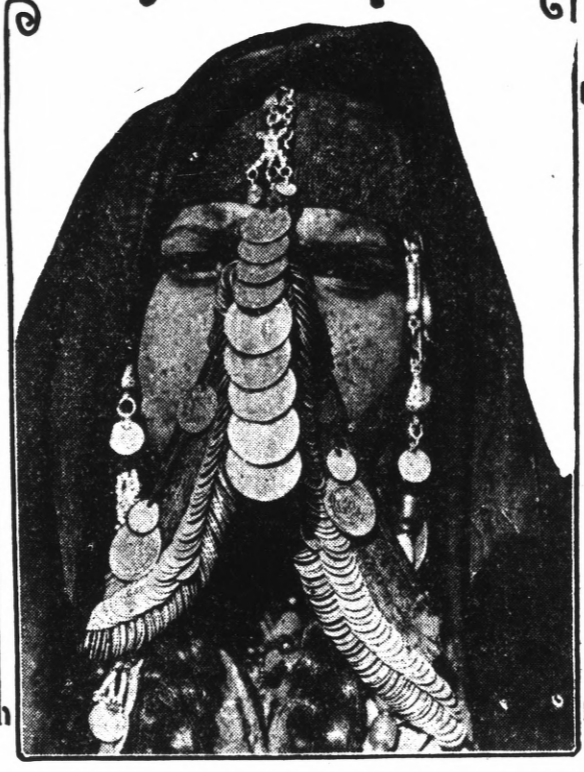

"Why," laughed Amelia, "it's you—you goose. I have reconsidered my refusal of last year."

Now that is all right, and as it should be—but who won those bets?

Wife Outlived Disraeli

At the time of their marriage Disraeli (Lord Beaconsfield) was thirty-five and his wife was fifty. She lived to be eighty-three.

Moneys of Many Lands

Woman of Palestine Wearing Her Money Wealth as Ornaments.

(Prepared by the National Geographic Society, Washington, D. C.)
THE United States has settled down to the use of the small size paper money so completely that the occasional large bill that is encountered seems awkward. One more chapter has been written in the long story of money.

Man has used money in some form since the dawn of civilization. Fishhooks and slave girls, beads, hawks and hounds, all have served as a medium of exchange. Early Virginians bought wives with tobacco. Once, it is said, Mexican Indians used cacao beans, until aboriginal crooks began making clay counterfeit, baked and varnished to look like the real.

The study of money, as an instrument of trade through the ages, involves art, heraldry, and mythology; it leads to economics and politics—and far into history. When kingdoms rose, often new moneys rose with them; and when they fell, their moneys passed away. Nothing shakes a government like the depreciation of its money. The very progress of civilization itself may be largely measured by the pace at which the various moneys of the world have been standardized and accepted by international commerce. It was, to a large degree, the quest for gold and silver, and their use in coined money, which led to the exploration and settlement of America, Australia, and South Africa.

The metal-disk money of the West was born in Lydia, at the eastern end of the Mediterranean, about 2,600 years ago. Cowrie, the lowly shell money of the antiques, has through the ages been the most widely circulated rival of the metal disk; but its day of dominance has departed. Only isolated communities still cling to it as money. Yet cowrie can boast that more people have used it than have clinked the metal disks in all their varieties. It has served a greater number of human beings as a medium of exchange than any other money devised by man.

China's Metal Coins

The cash of China, coins with holes in them, still dominate the marts of many men in a considerable corner of the Asiatic world. There exist inscribed cash pieces attributed to 1115-1679 B. C. and similar pieces, uninscribed, believed to be earlier.

The tao, also of China, was one of the first metal coins in the world. The word means "knife" or "sharped-edged instrument," hence the name was applied to the razor-shaped coins of old China.

The earliest Chinese metal coins are believed to have been miniature spades, uninscribed and without perforation and with open shank for inserting a handle. Some authorities place them earlier than 2000 B. C.

Convenience for carrying is accepted as accounting for the introduction and long use of perforated coins by China and its neighbors. From earliest times a string has been the poor man's pocketbook.

There have been many unique moneys in different countries. Nails were once so precious that they were used as money in Scotland and in New England in pre-revolutionary days. And while the mark was skidding to zero after the World War, postmasters in remote parts of Germany used shoe nails for small-change purposes—they had a fixed utility value.

Bars of crystal salt are money in many parts of Ethiopia. This medium of exchange, however, suffers deterioration in a strange way. It has become a nice courtesy, when meeting a friend, to proffer a coin to be licked! So does the money lose weight through friendly hospitality, and it is to be hoped that the salt acts as a germicide!

The Island of Yap, of the Caroline group, neighbors to the remote way of the South seas with the Philippines and New Guinea, undoubtedly boasts the strangest of money. It is of stone and the coins are sometimes 12 feet in

diameter and weight many hundreds of pounds!

When Cattle Were Money.

It is nearly 3,000 years back to the time of Homer, when there was no such thing in the Western world as money. People bartered in the markets, exchanging sucking goats for woven rugs. There were neither ducats nor dollars in which to price them, nor was there an established measure of value. The habit of haggling, still prevalent, may have come down from those ancient days of barter.

The idea of money was not yet born to that borderland of Europe and Asia that was then the West. The nearest approach to an article that would function as such was the milk-fed ox.

This animal possessed one prime requisite of money. It was generally recognized as a thing of value desired of all men. Money must primarily be something that every man wants, for which he will exchange any of his ordinary commodities, and the ox came nearer meeting this test, 1,000 B. C. in the triangle that was Greece, Egypt, and Palestine, than did any other element of wealth among the masses.

The peoples from which Western civilization sprang were pastoral folk, their wealth being represented in sheep and cattle. Gradually they came to measure other values by the unit of the herd, the ox. A little later armor was priced in oxen. A knight could buy a serviceable suit of armor for ten oxen, but one of choice workmanship would cost fifty.

The modern word "pecuniary," from pecus, cattle, has its place in our language because cattle were once money. Sheep represented a lower monetary denomination. They were small change! Ten sheep equaled one ox. After copper was mined in Cyprus and pots made of it, these utensils came to be used for money. Later conveniently shaped strips of copper replaced pots as a medium of exchange and later still these were of a definite weight. When shrewd traders debased the copper by mixing cheaper metals with it, or gave the pieces a short weight, it became necessary for the local government to step in, test the metal, and certify to its value by a stamp. Thus the modern idea of metal money of value was born.

When copper became plentiful and therefore cheap, it was too bulky to serve as the principal money. Silver displaced it and ruled the money world for 2,000 years. In time the same thing happened with silver that had happened with copper. It became too bulky to figure in large transactions. Gold, which had always been in the background as money, was brought forward to become the standard money metal.

Token Coinage and Paper Money.

Metal money did not remain wholly a matter of intrinsic value. It was discovered almost by accident that a strong government could take a piece of metal of relatively low value, stamp a higher value on it, and have it accepted in trade as though it were truly worth the stamped amount. Thus token coinage, or undervalue money, came into existence, marking another important step in money's evolution. It was partly real value and partly value based on trust in the issuing agency. In the United States all of our small silver, nickel and copper coins are tokens. None of them will melt down into metal of as great value as the denomination stamped on it.

Paper money may be looked upon as token money carried to its final extreme. A piece of it has no value at all in itself; the value depends wholly on a promise printed on it. But although the idea of paper money might be expected to have developed easily from token money, no one in the West seems to have considered the matter feasible until more than a thousand years after token coins appeared.

Daddy's Evening Fairy Tale

MARY GRAHAM BONNER

NEW CLOTHES

Mr. Polar Bear was asleep, half-scratching his face with his paws as he slept.

Suddenly he got up, did a little dance, waved his head as he looked about, and then took a bath.

"I asked you a question," said Mrs. Polar Bear.

"I was sleeping, my dear, and didn't hear you. What was your question?"

"I said that it felt like spring, and I asked you if you didn't think so, too."

"I think so, indeed," said Mr. Polar Bear. "My bath water is quite mild."

"I now envy our cousins up north going in the icy water. How they all do love it."

"Even the cubs, when they are only ten days old, are allowed to have an icy bath."

"To be sure they are," said Mrs. Polar Bear. "The mothers always see to that."

"Feels like spring," hissed the snakes to each other.

"How about your new suit, Mrs. Snake?" asked her neighbor.

"I'm getting rid of my old one in a very short time. I can't see very well now."

"What's your eyesight?"

"Wretched," said Mrs. Snake. "What about a smart spring suit for you, Mr. Snake?" asked Mr. Garter Snake.

"I'm being fitted for it now," said Mr. Snake, who always puts on many airs.

As a matter of fact he was getting his new suit just as the others were, and for that matter they were all getting suits to fit them under their old skins—the new skins were growing and the old top ones would soon be shed.

Soon it would be time to pull off the old ones and then the scales would fall off their eyes which were bothering them while getting new suits.

To be sure, they shed their skins at other times, but they think more of their spring suits than any others. They like to call them spring suits and feel fashionable.

The zebras were talking about shedding and getting all spruced up.

The ponies were being clipped and the goats and sheep were being sheared.

All of the creatures in the zoo were getting ready with new, freshened suits, and were so pleased about it, and how they would look.

The Wise Old Dog

There is a story of a wise old dog living at an English country house who, like all wise dogs, made friends with the cook.

The woodstock was some distance from the house, and when any kindling wood was wanted the cook would tell the dog to fetch some sticks. He knew quite well what she meant, and used to trot off to the woodyard and bring back a stick at a time. One day he was sent off on his errand and came back with a wagging tail and an empty mouth.

Cook sent him again, and yet again, but each time he came back empty-mouthed, wagging his tail apologetically. Cook was first puzzled and then angry, and calling the dog ugly names, drove him off on the same errand, determined that he should carry out her orders. Once more the old dog trotted away, and in a few minutes he came back with the hatchet dragging on the ground beside him! When he reached the house he dropped the hatchet before Cook, as if to say: "There's no wood cut, and if you want any you must go out and cut it!"

Resigned to Her Fate

Little Alice had been naughty beyond endurance all day, and at length Grandma in desperation remarked:

"Well, young lady, if you're not a better girl, you will never get to heaven."

"Well," said Alice, "I've been to the circus, and the chauntiqua, and I can't expect to go everywhere."

Absent-Minded Prof.

Prof. (at his evening work, as his two young sons come romping in)—Now, now, children, can't you let me work in peace?

Boys (in chorus)—We just wanted to say good-night.

Prof.—Oh, well, couldn't you wait with that till morning?

Did a Little Dance.

very short time. I can't see very well now.

"What's your eyesight?"

"Wretched," said Mrs. Snake. "What about a smart spring suit for you, Mr. Snake?" asked Mr. Garter Snake.

"I'm being fitted for it now," said Mr. Snake, who always puts on many airs.

As a matter of fact he was getting his new suit just as the others were, and for that matter they were all getting suits to fit them under their old skins—the new skins were growing and the old top ones would soon be shed.

Soon it would be time to pull off the old ones and then the scales would fall off their eyes which were bothering them while getting new suits.

To be sure, they shed their skins at other times, but they think more of their spring suits than any others. They like to call them spring suits and feel fashionable.

The zebras were talking about shedding and getting all spruced up.

The ponies were being clipped and the goats and sheep were being sheared.

All of the creatures in the zoo were getting ready with new, freshened suits, and were so pleased about it, and how they would look.

ONLY A DOCTOR KNOWS WHAT A LAXATIVE SHOULD BE

Danger lies in careless selection of laxatives! By taking the first thing that comes to mind when bad breath, headaches, dizziness, nausea, biliousness, gas on stomach and bowels, lack of appetite or energy warns of constipation, you risk forming the laxative habit.

Depend on a doctor's judgment in choosing your laxative. Here's one made from the prescription of a specialist in bowel and stomach disorders. Its originator tried it in thousands of cases; found it safe for women, children and old folks; thoroughly effective for the most robust man. Today, Dr. Caldwell's Syrup Pepsin, as it is called, is the world's most popular laxative. It is composed of fresh herbs and other pure ingredients. You can get it, in generous bottles and ready for use, at any drugstore.

Valuable Orchid Pod

Probably the most valuable flower seed pod in the world was on display at the Chelsea flower show in London in 1923. A single flower from one of the seeds sold for more than \$1,500, and others sold for \$1,000. It is estimated that the entire pod with seed is worth \$150,000. The pod is the fertilizer of a rare orchid, the miltonia armstrongii—Rocky Mountain News.

WHEN IT LOOKS DARK to any weak, nervous or ailing woman, Dr. Pierce's Favorite Prescription comes to her aid. Women in every walk of life today say Dr. Pierce's Favorite Prescription is a reliable medicine. It is made from roots and herbs, sold by druggists, in both fluid and tablet form.

One woman who used it said: "I think Dr. Pierce's Favorite Prescription is the best medicine any weak woman can take, especially at middle age. When I came to that period I seemed to go right down in health, was nervous, weak and rundown. I took the 'Favorite Prescription' and found it very helpful. It strengthened me, helped my nerves and I had no more trouble and I have been very healthy since."—Mrs. Eliza Lytton, 3530 Vanduyke Ave., San Diego, Calif.

Send 10c for trial pkg. tablets to Dr. Pierce's Clinic, Buffalo, N. Y.

In Training for Horsefear

Rev. Mr. Goodpatter—Was your late husband prepared to die?

The Widow Gaysport—I think so. He was chief of the fire department during his last two years.

Never tell a girl she looks sweet enough to kiss. Actions speak louder than words.

Bride Tells Her Secret

"FOR a young bride of twenty-one to lose her vitality and pep is disastrous, almost a sacrilege," says Mrs. George E. Pillow, of Franklin, Va. "That, however," she continues, "is just what I did."

"I had only been married a few months to an athletic husband, who went everywhere and did everything. I tried to keep up with his pace, and simply collapsed under the strain. I never was really ill; just mallow-skinned, depressed, and lifeless. Swimming, dancing, golf, I just couldn't face them. When I began to lose my clear complexion, I was desperate."

"Then one day a girl friend came to pay me a visit. In the bottom of her little bag of clothes lay a crystal-clear bottle—Nujol! A short woman-to-woman talk—a telephone call to a neighboring drug store—and my future happiness was settled."

"That was a year ago. Now I too am never without Nujol, which has brightened and cleansed my body like a cake of pure soap. I eat, sleep, swim, and hike with the enthusiasm of a child. My complexion is all it used to be—and best of all—I am my husband's little pal again."

The wonderful thing about crystal-clear Nujol is that it is not a medicine; it contains no drugs—it cannot hurt even a baby. It is simply the normal internal lubrication which

Beauty, Charm, Clear Skin—How Can They be Won?

your body needs. Let Nujol clear the poisons out of your body (we all have them), and flood the sunshine of happiness into your life.

It sounds like a fairy tale, but millions of people have proved it. So can you. Get Nujol at any drug store—sold only in sealed packages, with the Nujol trademark. It costs but a few cents and it will make you feel like a million dollars!

Shampoo the CUTICURA way

What a delightful and healthful shampoo it gives! Anoint the scalp lightly with CUTICURA OINTMENT; then make a strong lather with CUTICURA SOAP by dissolving shavings of the SOAP in hot water. Wet the hair thoroughly, then shampoo with the suds and rinse several times, finally with tepid or cold water. This will keep your scalp in a healthy condition, and your hair will be soft and lustrous.

Send for Cuticura Soap and Ointment to The Cuticura Co., P.O. Box 100, Lowell, Mass.

San Francisco

HISTORIC MANSION IS NOW IN RUINS

Ruins of the Abingdon mansion, one of the oldest houses in the country, the birthplace of Nellie Custis and once the property of George Washington. It was destroyed by fire at its isolated site on the Four-Mile run in Arlington county, Virginia.

Here's Matrimonial Ad in Newspaper of 1771

The art of matrimonial advertising seems to be of old standing, judging from an insertion in the Swedish provincial newspaper, the Carlskrona Verkblad, of 1771, recently unearthed and reproduced in a Stockholm daily. It is as follows: "The honorable public will not too adversely note the following well-meant advertisement. As it sometimes happens that a pretty and well-to-do girl long passes unnoticed just because of the fact that honorable suitors do not know her fortune, or how much her parents will bestow on her as a wedding gift, it is herewith announced that, now, an honorable girl twenty-one years of age, rather pretty, mannerly, a la mode and well bred; who besides, understands cooking, washing, baking, etc., which, no doubt, will be further improved through her intelligence when she, through marrying, gets more practice in household things, possesses in property, real and movable, about 15,000 Silver Dalers, besides which she expects a legacy from her old grandmother. If some decent bachelor, preferably a public clergyman or otherwise somehow well-situated man, should speculate a somewhat more precise address of the girl's guardian can be had at the printing office of this paper. But it is stipulated as a condition that none but gallant cavaliers, well built and of good carriage, take the trouble of offering their names; in the opposite case no further particulars will be given."

How Term "Thirty" Came to Symbolize an Ending

Charles Payne Smith gave the following information in the Typographical Journal regarding the origin of "30" as used by newspaper men and telegraphers: "The first press association organized in Civil war times was composed largely of morning papers published near the eastern seaboard. Each paper sent into the central office items of local interest, which were then edited and telegraphed to all members. It happened that the first message sent to the association totaled 30 words and this figure, with the words 'Good night' and the signature of the sender, was placed at the bottom of the sheet by the operator. At that time piecework was the rule on all papers. The daily list was usually set up, corrected and in the forms by 10 o'clock, but the compositors were compelled to wait around at their own expense until the foreman announced that '30' was in. So '30' became a byword among printers, symbolizing the end."

Man's Critical Faculty Potent Factor in Love

Man, as a rule, can be attracted by almost any pretty and relatively attractive woman. He can be stirred by any girl who is superficially charming, as most girls are today. But the test comes when that original attraction progresses to the place where it meets his critical faculty or instinct of self-protection. Then he says to himself, "Is this worth while?" Men may be charmed but they are never won at first sight. When they become critical they almost invariably experience a sense of puzzle that leads to which almost all of them will admit they have fallen prey during the process of falling in love. Then, if they are to be really won, they must find in the girl things which reassure them and convince them that it is worth while. The next step, therefore, depends entirely upon the girl. It is at this critical moment that she either wins or loses the game, almost entirely according to what she then offers. Adela Rogers St. Johns in Smart Set Magazine.

Who Built Temple Bar?

It is just upon 50 years ago that the last shops of old Temple bar were taken away from their site, although demolition had begun 18 months before. The stones were numbered and stored in Farrington road for eight years, when the space they took up being wanted, the city corporation gave them to Sir Henry Meux, who spent several thousand pounds in removing them and re-erecting the gate in his own grounds near Waltham Cross. How many people ask "Look here" in the London Daily Chronicle, could say who built Temple bar? It was erected by Wren in 1670, and stood at the City "Bar" for over 200 years.

Curly Maple

The forest service says that the cause of curly maple is not entirely known. It appears to be an accidental phenomenon and it is believed that it is not hereditary. Curly maple is secured from occasional white maple (sugar maple) trees among the stands of white maple trees throughout the Lake states. In the curly maple varieties the bark curls inward, forming a notch or depression. Experienced persons can identify curly maple trees by cutting into the bark. In the curly maple varieties little dimples or depressions will show in the wood. Curly maple can also be identified from the ends of the logs.

Waters From Icefield

The stream which ends in the famous Takaklaw falls in Yoho national park, British Columbia, is fed by the melting waters of the Waputik icefield which lies upon the summit of the Great divide. Flowing down the mountain for over half a mile it reaches the precipice that walls the east side of the Yoho valley. Here it takes a leap of 150 feet over the edge, then, gathering itself together, falls in a glorious curtain 1,000 feet down the face of the cliff, and finally tumbles in a magnificent cascade of 500 feet into Yoho river.

Life of a Sponge

Sponges live their own lives and eat their own food as other animals do. The separate existence of a sponge begins when a tiny particle, after being whirled about for a time by ocean tides and currents, eventually attaches itself to a piece of rock, and from that home it seeks its own livelihood. The food of infant sponges consists of yolk cells, which contain a form of nourishment. Later, as the sponge grows, it requires something more solid, and this is brought in by the currents.

"Great Britain"

Britannia Major, meaning Great Britain, was the name formerly given to the whole island to distinguish it from Britannia Minor, which was the name given to Brittany. James I used the title king of Great Britain, but without the sanction of parliament. It was not officially adopted until after the union of England with Scotland in 1707. After the union with Ireland in 1800 the country became known as the Kingdom of Great Britain and Ireland.

Position Wanted—Willing worker; graduate electrician; wishes to work as radio service man, or auto ignition and lighting; am equipped with proper tools. Filipino, 210 Macdonald avenue, Richmond. 2t

Jan. 31-010

Newspaper and magazine advertising made tremendous gains during the first seven months of this year. \$118,312,000 was spent for magazine advertising, an increase of 5.9 per cent., and the newspapers carried 708,510,000 lines of advertising, an increase of 4.5 per cent. National newspaper advertising gained 19 per cent. This is proof that it must pay to advertise.

Rheumatism and Neuritis
Hundreds of sufferers are finding Casey's Compound a real and permanent relief after years of suffering from Neuritis and Rheumatism. Reduces pain and swelling. Purifies and builds up the blood. On sale at all good drug stores. m28

The Terminal does the best job printing in town and its prices are low. Once you have had us do work you will come again.

"Voice-visit" with friends in nearby cities
Take a "voicetrip" home! Modern inter-city telephone service is very fast and clear. The front pages of your telephone directory tell about money-saving service and evening rates.

Charter Discussion Planned For April.

THE aggressive citizens of Richmond are advocating a mammoth mass meeting to be called in the near future. The object of the meeting is to discuss in the open a number of problems confronting the city, and to give able and conservative speakers an opportunity to say what our city needs. There isn't any doubt about Richmond's future. The city is growing despite its conspicuous handicaps.

Our sources of growth are so powerful and so many that the dragging influence of an incubus of politics in the interests of a clique will be thrown off quickly. With our present city charter nothing can be accomplished in giving the people a modern and economical form of government. The People are paying war prices for it; are they getting it?

Boost the Charter Movement!

By THE COMMTTEE.
